

AMENDMENT TO THE SPECIFICATION:

Please delete the specification as filed herewith, and substitute therefor the enclosed Substitute Specification in accordance with 37 C.F.R. § 1.125(b). No new matter has been added.

ADDITIONAL PARAGRAPHS TO THE SPECIFICATION:

In accordance with the Revised Rules under 37 C.F.R. 1.121 please add the following Abstract Of The Invention and a heading for the Abstract on a separate page following the claims. A separate sheet for the Abstract is attached hereto.

--ABSTRACT OF THE INVENTION

An electrical mains-powered actuator designed to operate a closing, darkening or solar protection element, having in a common enclosure, a direct current motor, a board controlling the motor power supply and an AC/DC voltage converter, the control board including a radio-wave receiver, such that the voltage converter enables lowering of the voltage and includes at least one switch controlled at a frequency (F1) such that it is at most equal to twice the mains sector frequency or such that its ratio to the radio-wave receiver frequency (F0) ranges between $2.2 \cdot 10^{-5}$ to $2.2 \cdot 10^{-4}$. --
